SanTRAL® Plus
The benchmark for washrooms, made smart.

Improved lock
Beveled, vandalism-proof lock

Improved window
An elegant bezel now encases a vandalism-proof window

Sloped roof
Sloped design prevents items from being placed on dispenser roof.

Hygienic & service-friendly
Smooth welds, bends and powdercoating ensure fast cleaning

Even more choices

**OBU 50**
- Open waste bin with new design, allows touchless disposal of used paper towel while concealing waste from view
- Internal bag holder makes replacing waste bags easier than ever
- Smart Ready
HYGIENE MADE DIGITAL

How can you ensure positive hygiene experiences, while reducing costs and improving productivity? Combine our intuitive OWMS software with our latest generation of intelligent dispensers.

Facility management has never been this easy

Unlock savings, increase productivity and guarantee satisfaction with OPHARDT Intelligent Solutions. Each intelligent dispenser or waste receptacle, transmits usage and fill-level data so that you and your workforce can optimize refill cycles and corresponding cleaning tasks.

Monitor and ensure efficacy of public infection prevention programs. The OPHARDT Washroom Monitoring System (OWMS) can simplify facility management in public washrooms, offices, shopping centres, healthcare facilities, sports stadiums and anywhere else hygiene is essential.

The internet of things may have no better place than in hand hygiene. At OPHARDT Hygiene we are fully committed to offering innovative, connected solutions that improve hand hygiene by offering reliable data and practical functions.

For healthcare institutions, the OPHARDT Hygiene Monitoring System® (OHMS), is a powerful tool for increasing hand hygiene compliance, reducing hospital-acquired infections and saving lives while also saving costs.

Our OPHARDT Washroom Monitoring System® (OWMS) creates efficiencies and improves user experiences in managing washroom facilities.
